MS WORD – Introduction|Open|Save|Keyboard Function|Formatting|Find & Replace

Brief View of MS Word

A word processor is a computer program developed by Microsoft.

The term “**Microsoft Office**” refers to Microsoft’s entire suite of office productivity applications.

Microsoft Word is one of the many applications under the “Microsoft Office” umbrella.

MS Word is a place where we can create professional-quality documents, letters, reports, etc.

It has many advanced features which allow you to edit and format your files and documents in the most feasible way.

Simply MS Word file is named as “**Documentation.**”

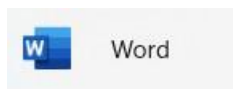

Step By Step Guide to Utilize MS Word

Activity 01

Getting starts with Word Doc

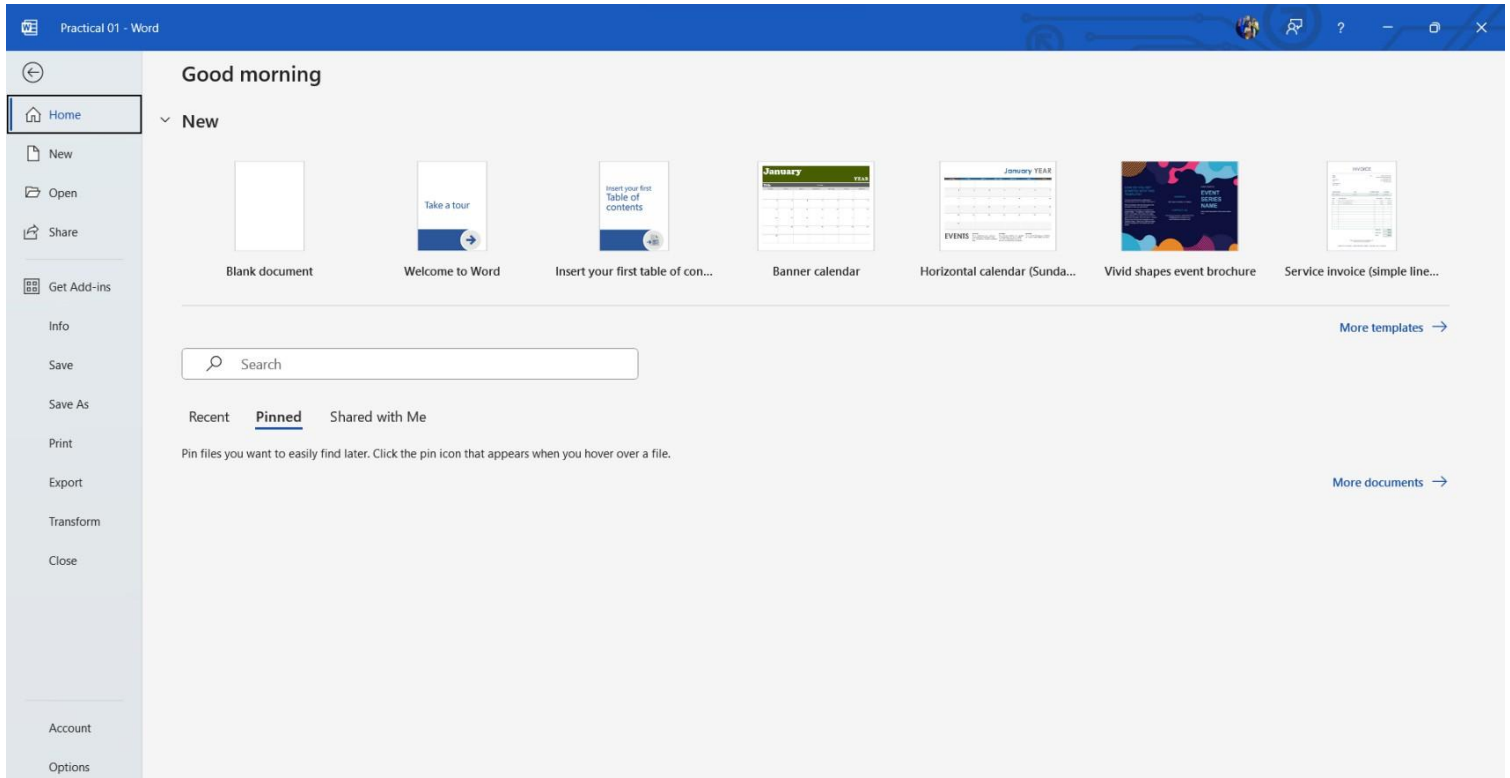

Start

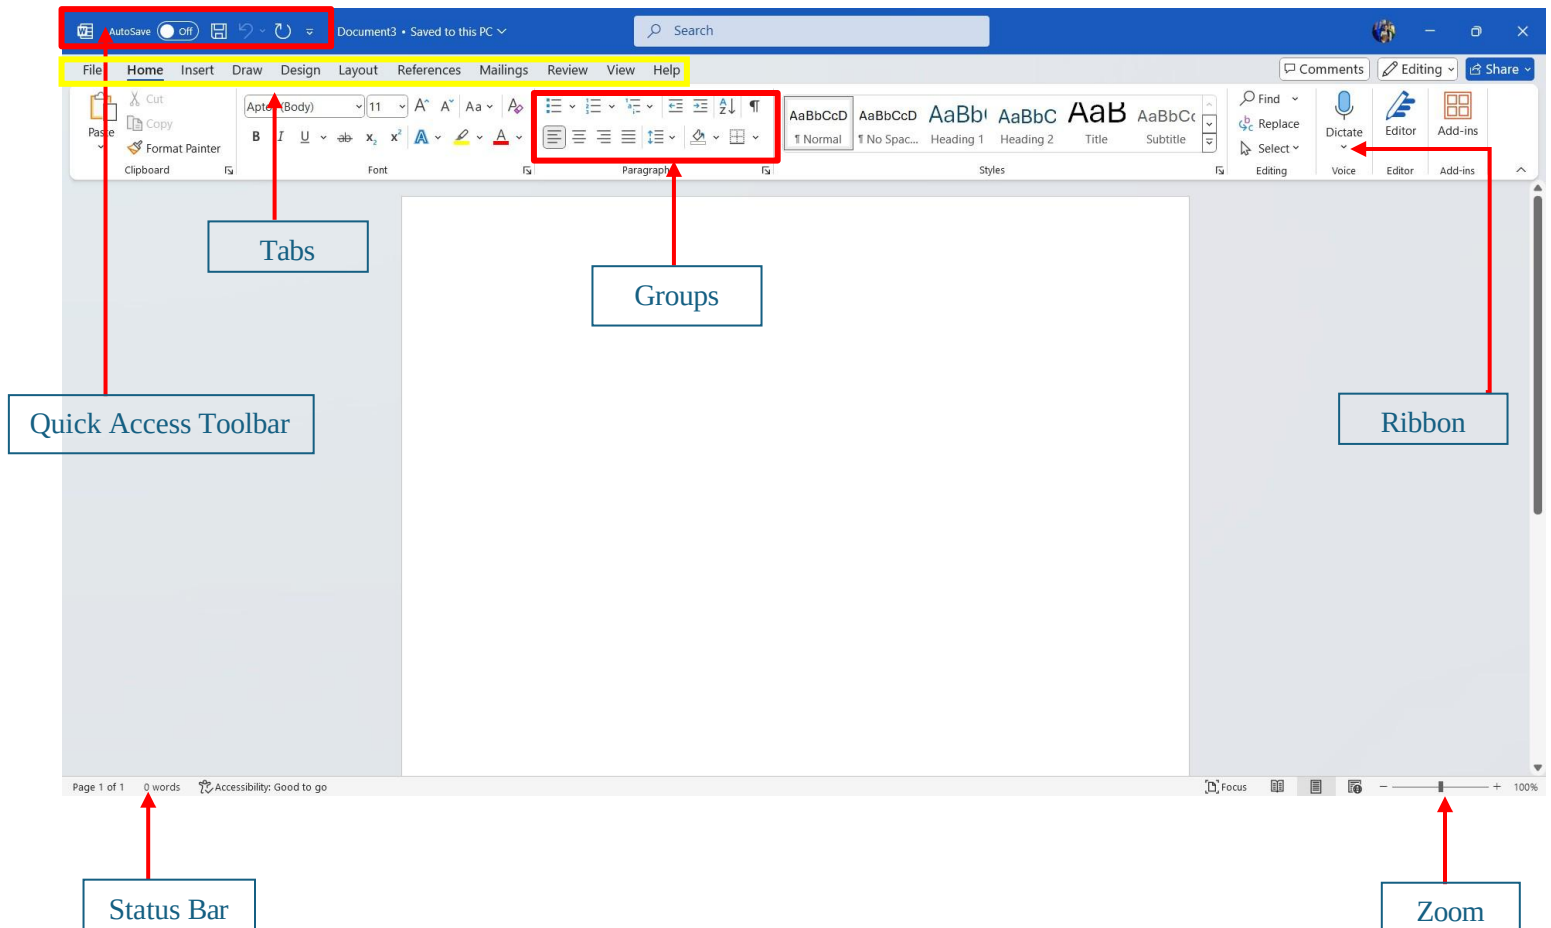

In all programs / In search bar **type word**

Then you will be directed to the version of MS Word that you have.

1. Then click the blank document.

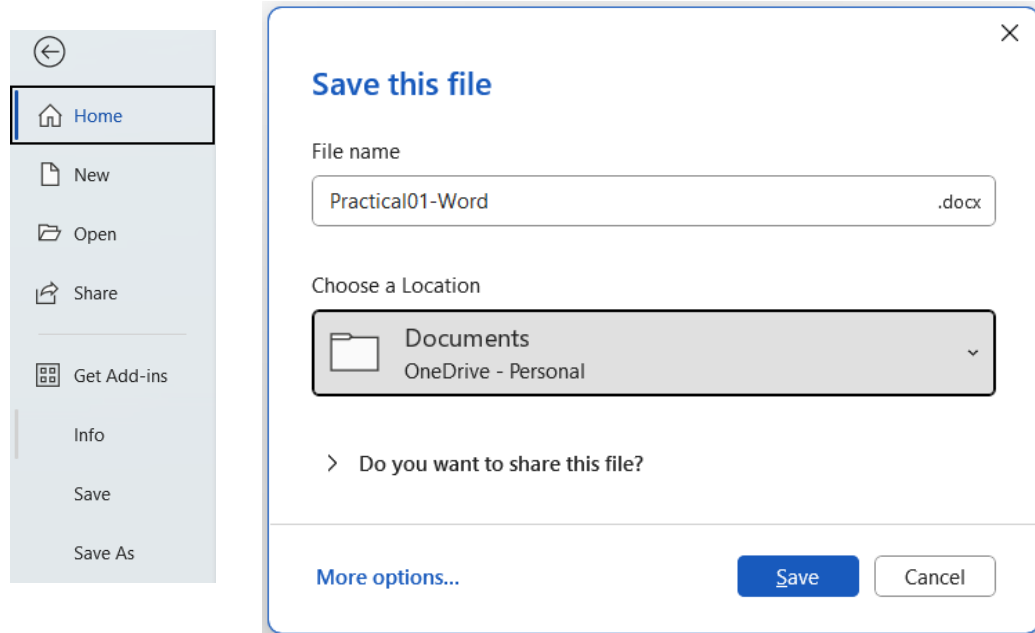

Activity 02

Saving your first document

- 2.1. In here you can see the word doc's default name is Document3
- 2.2. We can change its name and where we want to save the document.
- 2.3. If it is your first time saving, in the **backstage view** you can find save as and you can select the place where you want to save.

- 2.4. Otherwise, you can see a symbol  like this and just click it. This will help you to save the document. [ctrl+S]
- 2.5. Then you can find in the Title Bar the name has been changed.

Activity 03

Understanding the keyboard function

- 3.1. Type letter A and examine what will happen.
- 3.2. Now press the Spacebar key.
- 3.3. Hold down the Shift key and type the letter A.
- 3.4. Type the word learning and press the Enter key.
- 3.5. Type the word computer and press the Backspace key.

Activity 04

Paragraph Formatting

Cloud computing is the delivery of computing services over the internet, including storage, databases, servers, networking, and software. It allows users to access powerful digital resources without owning physical hardware, making technology more affordable and scalable. From on-demand applications to global data centers, cloud computing transforms how individuals and organizations operate, improving flexibility, collaboration, and performance. As digital transformation accelerates, cloud platforms continue to evolve, supporting innovation and driving modern business growth.

- 4.1. Insert the **heading** as **CLOUD COMPUTING** and type the above paragraph. [You can Copy (Ctrl+C) and Paste (Ctrl+V).
- 4.2. Apply **Heading 1 style** to the heading, make it **bold, italic, underlined**, and **center-aligned**.
- 4.3. Apply a **border and a background color** to the paragraph.
- 4.4. **Bold** and **highlight** the phrase “**delivery of computing services over the internet**” with **yellow**.
- 4.5. Change the color of the word “**cloud**” (whenever it appears) to **red**.
- 4.6. Set the **line spacing** of the paragraph to **1.5**.
- 4.7. Apply a **strikethrough** to any one word in the paragraph (example: hardware → ~~hardware~~).
- 4.8. **Justify** the paragraph alignment.
- 4.9. Change the **font size to 12** and the **font family to Times New Roman**.
- 4.10. **Capitalize** the term **Cloud Computing** wherever it appears.
- 4.11. Move the paragraph far away from the margin. (Increase the indentation)

Activity 05

Superscript & Subscript

1. Write the scientific formula using proper subscript formatting:
 - “**The chemical formula of carbon dioxide is CO₂.**”
 - → Apply subscript to the number 2.
2. Rewrite the sentence using **superscript** for ordinal numbers:
 - “**The school will celebrate its 75th anniversary on 15th July 2025.**”
 - → Apply superscript to **75th** and **15th**.

Activity 06

Numberings & Bullets

6.1. Write down the following in your word document

1. Python Programming Concepts
 - a. Core Syntax Rules
 - Indentation Requirements
 - Variable Naming Conventions
 - b. Data Types
 - Integers
 - Strings
 - Dictionaries
 - Lists
 - List Indexing
 - List Slicing
 - Flash Runtime Access
 - Flash Access Macros
 - Flash Access Functions
 - c. File Handling
 - Opening Files
 - Reading & Writing
 - Read() and Readline()
 - Write() Function
 - Closing Files

6.2. Write down the following in your word document

1. Introduction
 - 1.1. Purpose of the Project
 - 1.2. Scope of the Project
 - 1.2.1. Key Deliverables
2. Requirements Analysis
 - 2.1. Functional Requirements
 - 2.1.1. User Login & Authentication
 - 2.1.2. Data Processing Features
 - 2.2. Non-Functional Requirements
 - 2.2.1. Performance Requirements
 - 2.2.2. Security Requirements
3. System Architecture
 - 3.1. Main Components
 - 3.2. Technologies Used
 - 3.2.1. Backend Technologies
 - 3.2.2. Frontend Technologies
 - 3.3. Deployment Model
 - 3.3.1. Cloud Hosting Environment

Activity 07

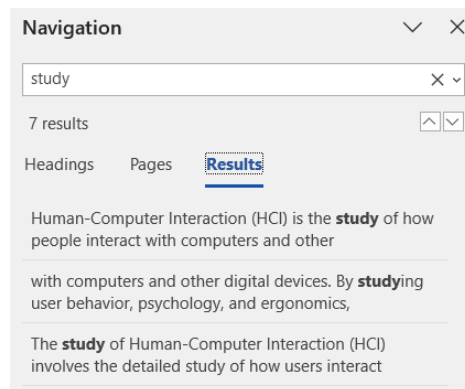

Find and Replace - Consider the following paragraph.

Human–Computer Interaction focuses on understanding the way individuals use digital systems, highlighting the importance of designing interfaces that improve efficiency and comfort. Researchers examine common difficulties users experience and work to create solutions that make digital interactions more intuitive and user-friendly.

7.1. Go to the **Home** tab and click on the **Find** command located on the right side of the ribbon under the Editing group.

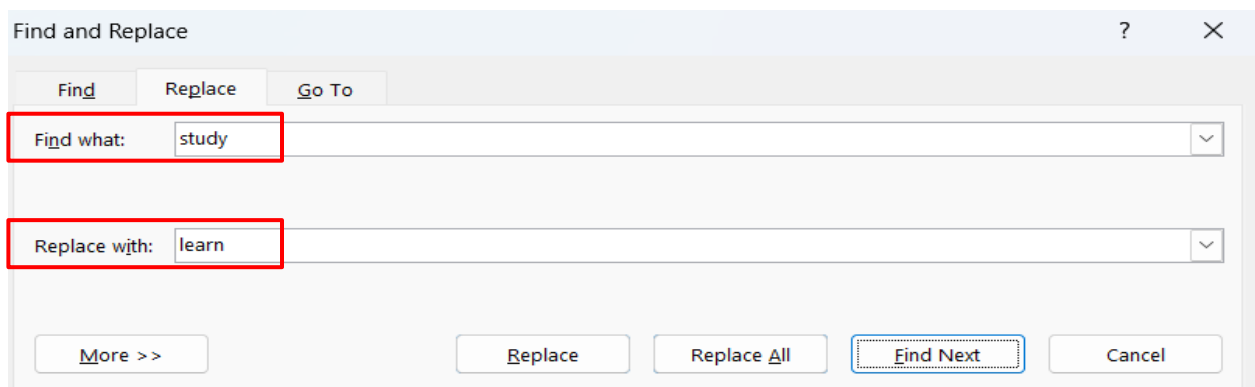

7.2. You may also use the keyboard shortcut **Ctrl + F** to open the **Navigation Pane** on the left side of your Word window.

7.3. Type the word you want to search for. (Example: **users**)

7.4. When matches are found, Word will highlight the results in **yellow**, and all occurrences will be listed in the Navigation Pane.

7.5. To replace a word or phrase, click on the **Replace** option from the Home tab, or press Ctrl + H to open the **Find and Replace** dialog box.

7.6. Choose **Find Next**, then select **Replace** to change only the current occurrence, or **Replace All** to update every instance throughout the document.
